

## Seminar Report on Enterprise Resource Planning Powered by TCS iON

- Conducted on 26<sup>th</sup> September, 2014

ERP or Enterprise Resource Planning is a term used for business management systems which are designed to integrate the data sources and processes of an entire organization into a unified system. This is one tool that is used in each and every field of the business, be it Finance, HR, Marketing, Operations Management, etc.

The seminar was mainly conducted by Talent edge and powered by TCS iON. Talent edge is the institute which provides Diploma in Enterprise Management System. This session was mainly for the awareness regarding ERP as an industry and career choice and also the utilization of ERP into various functions of the business.

The seminar was a great success where the students came to know about what ERP actually is and how it can be opted as a career option. The session was very interactive and the speaker involved the audience quite effectively into what he was delivering. He welcomed all questions and made the concept of ERP clear in the minds of the students. To keep the students involved he also had gifts for the students who answered his questions correctly.

During the later part of the session he also briefed the students about the course Talent edge is offering on ERP. The tenure of the course, syllabus and the fee structure was all communicated to the students. As it is powered by TCS iON, the students who complete the course with Talent edge, would be getting a certificate of completion from TCS iON.

In totality, it was a great learning experience and each and every student who attended the session was fully satisfied on their understanding of the concept of ERP.
